

Asbestos Safety Training

Asbestos Kills!

You must ensure that your company is compliant with HSE regulations. Non-compliance risks a custodial sentence/prosecution, personal fines and disqualification from directorship.

Asbestos is a highly dangerous substance that must be contained, monitored and managed. There are very important regulations in place to safeguard people that deal with asbestos. Exposure to Asbestos can result in serious illness and death. Here at **Asbestos Safety Training**, we are fully versed in the Asbestos regulations and we are in a position to offer training and advice when you are dealing with the substance.

Training is Mandatory

Stated in the Control of Asbestos Regulations 2006, it is mandatory for anyone to receive training who is involved in disturbing the fabric of a building (Control of Asbestos at Work Regulations 2006).

This includes maintenance workers and others who may come into contact with or who may disturb asbestos as well as those involved in asbestos removal work.

We can offer training, which complies with HSE requirements and covers the following:

- Refurbishment when Asbestos is present
- Maintenance
- **Mandatory Requirements (Control of Asbestos Regulations 2006)**
- Types of Asbestos
- Possible Locations
- Duty to Manage by the Duty Holder/Client

Training For Small Builders and Tradesmen

If you are a small independent builder or self employed tradesman then Asbestos Safety Training can benefit you. People such as electricians, joiners, plumbing & heating engineers and insulation specialists that work on old domestic/residential premises built between 1900 & 1990 may be at risk from Asbestos. These older buildings may house Asbestos Containing Materials and can be hazardous!

DON'T IGNORE THIS HIDDEN KILLER! Don't expose yourself to asbestos! Get clued up and know how to work safe and protect yourself!

We run local courses aimed at raising awareness of this hidden killer for small/independent business/tradesmen.
