

## **CCNSG Safety Passport (ECITB)**

The nationally accredited CCNSG Safety Passport scheme is designed to enable contractors to improve health, safety and environmental awareness. It will also benefit your company by reducing accident rates and incident related costs and putting a stop to repetitive health and safety inductions.

The CCNSG Safety Passport Scheme is a nationally recognised qualification. Many companies insist on personnel holding the CCNSG Safety Passport qualification before allowing them access to a site or premises. The CCNSG Safety Passport course gives basic knowledge of Health and Safety and complements on-site induction, enabling employees to work more safely and with lower risk to themselves and others. The CCNSG Safety Passport is valid for three years, after this period renewal consists of a 1-day\_CCNSG Safety passport refresher course.

The CCNSG Safety Passport training course meets the statutory requirements of the Health & Safety Executive.

### **Who Should Attend the CCNSG Safety Passport?**

All employees within the construction and engineering industries and sub-contractor personnel working within the installation and maintenance sectors.

#### **CCNSG Safety Passport Course Outcomes**

#### **By the end of the CCNSG Safety Passport training course, delegates should be able to:**
